

ARYAN NITIN KONDEKAR

aryankondekar16@gmail.com · github.com/Aryan41211 · linkedin.com/in/aryankondekar · Pune, India

TECHNICAL SKILLS

Core: Python, SQL, C++ | scikit-learn, XGBoost, FAISS, sentence-transformers (MiniLM), NumPy, Pandas

Frameworks & APIs: FastAPI, Django REST Framework, Flask, Streamlit

MLOps & Infra: Docker, pytest, Git, GitHub, SQLite, Jupyter Notebook

Concepts: NLP, Semantic Search, Vector Embeddings, Supervised Learning, Data Drift Detection, REST APIs, OOP

EXPERIENCE

Machine Learning Intern — Pratinik Infotech

Mar 2026 – May 2026

Stack: Python · Streamlit · scikit-learn · XGBoost · FastAPI · SQLite · Plotly · Docker · pytest

- ▶ Built an end-to-end MLOps observability platform (experiment tracker + model registry + drift monitor) using Streamlit and SQLite to centralize model lifecycle management and cut down on manual tracking work.
- ▶ Engineered a 7-stage ML training pipeline supporting 6 algorithms (Random Forest, XGBoost, GBM, SVM, LR, Decision Tree) with StratifiedKFold cross-validation across multiple benchmark datasets.
- ▶ Designed a decoupled 3-layer service architecture (UI / business logic / persistence) with a FastAPI inference endpoint featuring model-stage awareness (production vs. staging) to support safer, staged model rollouts.
- ▶ Implemented KS-test + PSI-based feature-level drift detection with severity-tiered alerts and per-feature diagnostic history, enabling proactive data quality monitoring across 10K+ record production datasets.
- ▶ Containerized the platform via Docker and authored automated pytest suites covering core pipeline and drift logic, improving deployment reproducibility and easing regression detection.

PROJECTS

NyaySaathi — NLP Legal Intelligence Platform

Jan 2026 – Mar 2026

Stack: Python · Django REST Framework · FAISS · sentence-transformers (MiniLM) · NumPy

- ▶ Built a semantic legal search engine over a 12K+ document corpus using MiniLM sentence embeddings and FAISS vector indexing, replacing a slower linear TF-IDF baseline.
- ▶ Designed and exposed 4 REST API endpoints via Django REST Framework for query intake, embedding generation, and ranked result retrieval, enabling plug-and-play frontend integration.
- ▶ Optimized FAISS index construction (IVF + flat quantizer) to handle similarity search over a 768-dimensional embedding space with memory-efficient index serialization.

Library Management System — Flask + CLI

Feb 2025 – Mar 2025

Stack: Python · Flask · JSON · OOP · Role-Based Access Control

- ▶ Developed a full-stack Library Management System with CLI and REST interfaces; seeded 1,000+ book records in JSON storage with borrow/return tracking, overdue management, and advanced multi-field search.
- ▶ Structured modular OOP layers (auth, catalog, transactions) with PIN-based session security and robust error handling — designed database-agnostic for future migration to PostgreSQL or SQLite.

Supervised ML Model Benchmarking

Jan 2025 – Mar 2025

Stack: Python · scikit-learn · NumPy · Pandas · Matplotlib

- ▶ Benchmarked 5 supervised ML models on 5K–15K row real-world datasets; evaluated with confusion matrix, precision-recall, F1, and CV — achieving 75–85% accuracy and documenting reproducible workflows on GitHub.

Exploratory Data Analysis Pipeline

Mar 2025 – Jun 2025

Stack: Python · Pandas · NumPy · Matplotlib

- ▶ Designed reusable EDA pipelines covering missing-value imputation, outlier detection, and aggregation transforms across multiple real-world datasets to standardize preprocessing for downstream projects.

EDUCATION

B.Tech, Computer Science Engineering — Savitribai Phule Pune University

Aug 2024 – Present

HSC (Science) — Maharashtra State Board (MSBSHSE) —

Jun 2022 – Mar 2024
